

# TALENT SEARCH

*Wytheville Community College*

## What is Talent Search?

Talent Search is a federally funded TRiO program, through the U.S. Department of Education. The program identifies and assists First-generation income eligible students in grades six through twelve who have the potential to succeed in college. We provide academic, career, and financial aid counseling to our participants and encourage them to continue their education. Our services are provided through in-school workshops and educationally focused out-of-school activities.
